State-Wise Electric Vehicle Sales Analysis(2023-2025)

Software Used-IBM SPSS Statistics

Submitted By-Anshika Singh(039)

INTRODUCTION

"Electric vehicles are becoming increasingly important in the automobile industry. This project analyses electric vehicle sales across Delhi, Uttar Pradesh and Maharashtra during 2023, 2024 and 2025. IBM SPSS Statistics is used to organize the data, calculate descriptive statistics and create charts for comparing sales across states and years."

Objectives

Objectives of Project:

1.To analyse EV sales across three states.

2.To compare sales during 2023, 2024 and 2025.

3.To identify the state with the highest average sales.

4.To present sales data using charts and descriptive statistics

Data Table

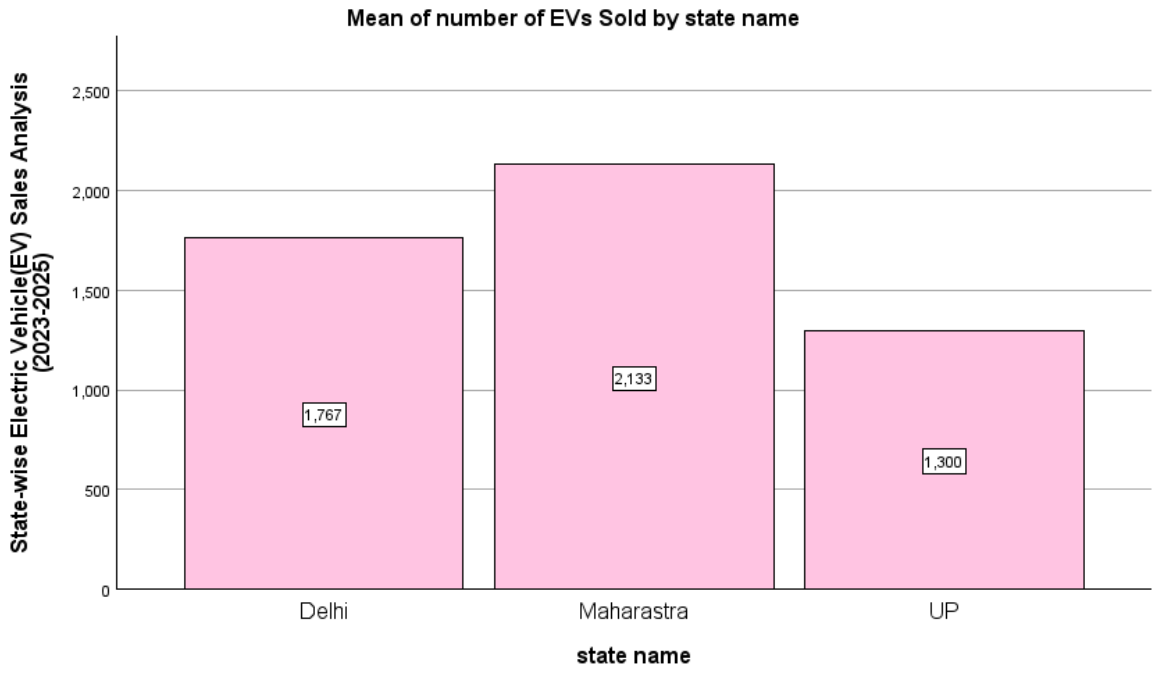

Year	State	EV Sales	Category
2023	Delhi	1200	TwoWheeler
2023	UP	900	TwoWheeler
2023	Maharastra	1500	FourWheeler
2024	Delhi	1800	TwoWheeler
2024	UP	1300	FourWheeler
2024	Maharastra	2100	FourWheeler
2025	Delhi	2300	TwoWheeler
2025	UP	1700	FourWheeler
2025	Maharastra	2800	FourWheeler

Descriptive Statistics

Descriptive Statistics

	N	Minimum	Maximum	Mean	Std. Deviation
number of EVs Sold	9	900	2800	1733.33	593.717
Valid N (listwise)	9				

Graphical Analysis

Conclusion

"Based on the available dataset, Maharashtra has the highest average EV sales among the three states, followed by Delhi and Uttar Pradesh. The charts and descriptive statistics help compare sales patterns across the selected states. Further analysis can be performed using year-wise sales and vehicle categories."
